

SAFETY AT WORK

2,500 INCIDENTS

Each year there are over 2,500 RIDDOR incidents involving transport in the workplace and being struck by a vehicle is one of the most common causes of fatal workplace accidents

DID YOU KNOW?

Small contractors are often not equipped to work on hazardous sites because they lack proper PPE, yet they engage in projects that require such equipment?

£5,000

On average one non-fatal injury costs employers £5,000. The cost is made up of lose productivity, health and rehabilitation, admin and legal costs and injury compensation!

17,000

Injuries to staff in all categories who work on the mainline rail, increased by 20% between April 2021 - March 2022. Severe injuries causing more than a week's absence have increased by 10%. Railway worker database adds 17,000 accidents upon a workplace

3X MORE

Construction workers who do not use PPE are 3 times more likely to be injured than those who do (Lette et al 2018)

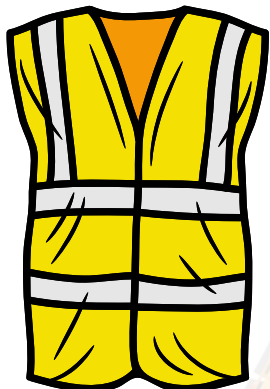

61,000 INJURIES

There are 61,000 non fatal injuries to construction workers in the UK each year. The fatal injury rate for construction is around 4x the industry rate!

DID YOU KNOW?

The appropriate use of PPE is one of the most important safety factors in avoiding physical injuries?

WHAT IS PPE SAFETY

PPE safety is the practice of ensuring a safe, working environmental for employees and visitors through the use of Personal Protective Equipment (PPE). Safety is paramount to all businesses across industries. It is essential to protect employees from potential risk and hazards with the correct PPE protective clothing
