

PROTECT WORKWEAR

At PULSAR® we pride ourselves on our multipurpose and versatile garments. If two or more types of clothing are worn, they should not interfere with each other. That's why we have a multitude of garments that interact with one another whilst maintaining safety standards. We can protect the wearer in whatever layer they choose to wear, in both wet and cold weather conditions, as well as warmer, milder climates.

From combat trousers to polo shirts for men and ladies in both long and short sleeves, as well as some that incorporate cut resistant material from elbow to cuff for added protection. There are a great selection of mid-layers, including softshells, fleeces and body warmers. Genuine Teflon treatment used on our combat trousers and coverall, ensures unrivalled stain resistance to dirt and grease.
