

BLIZZARD THERMALS

The PULSAR® Blizzard thermal collection is designed to maximise the warmth and comfort of the wearer whilst they are working in colder working environments including outdoors, warehousing and chilled food industries. The collection includes long and short sleeve tops, as well as long pants for both men and women, together with two balaclavas, snood and Hijab.

The Blizzard thermals incorporate a polyester/VILOFT® blend. VILOFT® is made from 100% natural resources as well as being completely biodegradable (see page 72).

VILOFT®

A NEW DIMENSION OF COMFORT

After almost 100 years of production of round cellulosic fibres, 1985 saw the creation of VILOFT® - the world's first flat viscose fibre. The flat cross section delivers flexibility in the fibres and increases their surface area. When spun into a yarn, VILOFT® fibres align in a random pattern and form hollow spaces filled with air.

Viscose fibres are biobased and consist like cotton almost entirely of cellulose. Viscose is produced by extracting cellulose from wood and reshaping it into fibres. The advantage of this process is, that shape and diameter of the fibres can be modified in order to obtain special properties.

Round Fibres
Fibres with a round cross section form only limited hollow spaces inside a yarn.

Blends with VILOFT
VILOFT fibres in the blend form larger hollow spaces inside a yarn.

BZ1503 & BZ1552 BLIZZARD Long Pants

- Close fitting thermal pants, designed to wear under usual clothing to provide warmth and comfort in freezing cold temperatures
- Soft durable polyester blended with VILOFT®, offering exceptional thermal & wicking performance
- Light blue contrast sewing thread used for sporty look
- Flat locked stitched and seams for extra comfort
